

[Polymet Corporation to Exhibit at the International Thermal Spray Conference](#)

Polymet will display its broad line of arc spray wire at the International Thermal Spray Conference in Hamburg, Germany on September 6-9, 2011

Online PR News "15-September-2011" CINCINNATI, OH - Polymet Corporation, a leading manufacturer of wire for hardfacing, welding and thermal spraying, will be exhibiting at the International Thermal Spray Conference & Exhibition in Hamburg (ITSC), in Germany on September 27-29, 2011.

Â

The ITSC is the premier thermal spray event, showcasing new developments in equipment, materials and thermal spray technology. Polymet will exhibit it's complete line of wire products, including new materials such as Vecalloy B, a new arc spray material for wear applications.

Â

There is a growing demand for thermal spray coatings for a wide variety of industries. When it comes to thermal spray wire, we at Polymet, believe in constant development of new coatings materials and processes to meet the latest requirements of our customers and prospects. says Bob Unger, Sales Manager at Polymet.

Â

About Polymet

Â

Polymet (www.polymet.us), a world-class manufacturer of high performance wire for hardfacing, welding and thermal spraying, produces high quality products used in the aerospace, automotive, cement, mining, lumber, nuclear, power generation and many other industries. Our wires are ideal for demanding applications such as metal to metal, metal to earth, high impact, high abrasion, corrosion and high temperature, or combinations of these wear factors.
