[Virtosoftware Released Virto Tab Navigation - a New JQuery-Based Web Part for Easy Navigation over](#)

Virtosoftware announced the release of a new Microsoft SharePoint component that provides features for organizing web parts on a SharePoint site page into tabs Virto Tab Navigation.

Online PR News â€" 17-January-2012 â€" San Francisco, CA (USA), Tuesday - January 17, 2012 -- Virtosoftware announced the release of a new Microsoft SharePoint component that provides features for organizing web parts on a SharePoint site page into tabs Virto Tab Navigation.

Â

Virtosoftware is glad to announce its first new product in the year of 2012 Virto Tab Navigation (

http://www.virtosoftware.com/News/detail/Virto-Tab-Navigation-a-New-JQuery-Based-Web-Part-for-Easy-Navigation-) compatible with both SharePoint 2007 and 2010 for convenient organizing web parts on a SharePoint site page. Virto Tab Navigationis a lightweight JQuery based control for grouping web parts from a site page and

displaying them in several tabs rather than on a single page with scrolling.

Â

Once Virto Tab Navigation (

http://www.virtosoftware.com/News/detail/Virto-Tab-Navigation-a-New-JQuery-Based-Web-Part-for-Easy-Navigation-
) is installed, SharePoint user can easily reorganize a site page with a number of web parts by combining
controls into several groups and displaying each group as a separate tab with its own title and color theme.
The component options allow for editing tab titles, changing the order of the tabs, using predefined color
themes as well as creating custom ones. With Virto Tab Navigation can you can quickly organize your
SharePoint pages in the most convenient way.

Â

The release of Virto Tab Navigation expands a line of Virtosoftwares products for organizing SharePoint
content. Together with Virto Data Gridfor convenient displaying SharePoint lists and SQL items, Virto Cross
Site& Cascaded Lookup for joint displaying associated data from several distinct sources, Virto Pivot View for
visualization and convenient management of large amount of data, and Virto Tag Cloud for effective data
structuring, Virto Tab Navigation (
