

[SkyRiver.net Is Now Offering High Speed Internet In Orange County](#)

Based and operated in San Diego, California, Skyriver Communications is one of the premier US providers of highly professional connectivity services. The company will soon celebrate a decade since it first began offering its complete set of communication solutions to clients from numerous states in the US

Online PR News "13-February-2010" Based and operated in San Diego, California, Skyriver Communications is one of the premier US providers of highly professional connectivity services. The company will soon celebrate a decade since it first began offering its complete set of communication solutions to clients from numerous states in the US. The broad collection of services presents small-medium businesses, hospitality markets and enterprises with speeds starting from T1 Orange County to high speed internet Orange County connections featuring over 200 Mbps.

Â

The companys high quality of service has led to Skyriver Communications becoming one of the most sought after providers of T1 Orange County, broadband Orange County and high speed internet Orange County connections in North America. By utilizing cutting edge technology and employing only highly trained experts, Skyriver Communications has been able to maintain a high level of service quality and an excellent level of customer satisfaction throughout its numerous years of operation. As opposed to numerous communications service providers, the T1 Orange County, broadband Orange County, high speed internet Orange County services being offered by Skyriver Communications are based on an infrastructure that does not rely on phone companies, thus making the companys services significantly more reliable.

Â

From a desire to provide its customers with a more complete set of solutions that covers numerous aspects of the day to day operations of any business or enterprise, Skyriver Communications is also offering customers with a wide range of complementary services which include network management, business continuity solutions, IT solutions and support, and any other related services which will enable each customer to focus completely on the business and not on network and all the related issues that might arise.
