

[Ecosmob launched a revamped version of its service centric website Asteriskservice.com](http://www.asteriskservice.com)

*The website was reborn on the magic date of 11.11.11 to encompass more features and navigation ease.*

Online PR News â€œ 09-May-2012 â€œ Ahmedabad, India 11 November, 2011 Ecosmob Technologies Pvt. Ltd., a leading VoIP solutions company since 2007 that specializes in services for ITSP and Call Centers, announced the launch of its revamped service-centric website Asteriskservice.com on the magic date of 11.11.11. The website was reborn with more added features and navigation ease. One of the major additions was the solutions feature that would help businesses from any vertical and size understand how Asteriskservice.com can make a difference to them.

Â

Asteriskservice.com offers expert services for custom Asterisk development, installation and configuration, Dial plan programming, IVR designing, AGI scripting, Fax support, Vicidial installation and configuration, A2Billing, AstBill and support for FreePBX, TriBox or Hylafax to power the IP PBX systems, VoIP gateways, Conference Servers and much more.

Â

The company has to its credit a number of successfully implemented medium to big sized Asterisk projects like Conference Solutions, Phone Verification Systems, Hosted PBX Solutions, DID Routing Engine, Proxy & Billing Solutions, Dictation Application, IVR Application for Insurance Companies, Quiz Application and CallShop Application. Their clients range from small to large Businesses, Call Centers, Carriers and Governments worldwide.

Â

The website restructuring was little overdue and we thought of finally making it happen on the magic date of 11.11.11 said Maulik Shah, Director at Ecosmob Technologies Pvt. Ltd. We are sure that with this new look and features, our visitors would find the entire experience of visiting the website more interesting and engaging.

Â

CosmoBS, which is the flagship packaged service of Asteriskservice.com, is an ideal automated marketing solution. This automated speech enabled application is specifically developed for inbound and outbound customer services, third party telephonic verification, political advertising, virtual assistant desks and numerous other uses. CosmoBS helps easy facilitation and integration which helps small and medium-sized businesses save upto 30-70% of hiring cost on voice agent.
