

[Regency MPS Earns Peak Premier Partner Status with Xerox Corporation](#)

Joins Elite Group of Managed Print Service Providers

Online PR News â€“ 10-May-2012 â€“ Regency MPS, a subsidiary of Regency Office Products, is proud to announce their status as a Xerox Peak Premier Partner. In earning this recognition, Regency becomes one of a select few Xerox partners in the U.S. to reach this level, with less than 1 percent of all Xerox dealers nationwide achieve this standing.

Â

In order to achieve Xerox Peak Premier Partner status, Regency MPS was evaluated based on guidelines and criteria surrounding its unique managed print service platform, patented processes and overall knowledge. As a Peak Premier Partner, Regency MPS expands their product offerings of Xerox printers and multifunction printers while providing best in class tailored solutions to meet clients specific business needs.

Â

Managed print service is clearly the path of the future. Regency has quickly embraced this technology, developing a specialized team and enabling them to offer their customers innovative solutions to MPS, stated Hans-Erik Johnsen, account manager with Xerox Corporation. Together, our consultative partnership brings more value to their customers.

Â

Outsourcing of support services, like internal document output, is becoming increasingly common for organizations. As a Xerox PagePack certified managed print services provider, Regency MPS has access to proven tools developed by Xerox to help reduce printing support efforts and budget more accurately, with predictable monthly billing. Regency MPS shows their clients how they can benefit and capture those savings with a management program, regardless of whether they have a few printers or an entire enterprise printer fleet.
