

[Outlook PST Files Split Tool Now Supporting Outlook 2010](#)

A great news for all those who use Outlook 2010 for their emailing requirements that they can now easily perform Outlook PST files split process by using an efficient PST splitter tool - SysTools Split PST software, which is now made Outlook 2010 supportive.

Online PR News " 15-May-2012 " Gothenburg, Sweden, MAY 15, 2012 - SysTools Split PST is one of the most widely used software package of SysTools Group used to perform Outlook PST files split process. This tool will now serve a larger number of users as this split PST tool now supports the latest MS Outlook version i.e. Outlook 2010.

Â

At the launch of new version of this software with an updated feature, Evan Swans (Director of Product Development, SysTools Group) happily expressed his feelings in these words, We are contended to see the position that we have been able to create in the market today. We believe that it is our ability to adapt rapidly evolving customer preferences that has helped us create useful products for them. It is worth pointing out that it is our pleasure to announce that SysTools Split PST software will now work for Outlook 2010 users as well. Our motive is to satisfy a majority of users owing to this reason we try to make our tools comprehensive so that that they can work for all users.

Â

To divide PST files into smaller size files, SysTools Split PST software is very helpful. Several users all over the world can perform Outlook PST files split process by using this PST Splitter in order to break oversized PST files into smaller parts for the sake of convenience. The software is efficient enough to split Outlook archives files also with utter ease. The process to divide PST files into smaller size will definitely increase Outlook speed and performance both.
