ChiroTouch To Attend the Texas Chiropractic Association Annual Convention

Â

San Diego, CA June 1, 2012 ChiroTouch, the nations leader in chiropractic software, is pleased to announce it will be attending the Texas Chiropractic Association Annual Convention in Austin, TX, on June 7, 2012.

Â

At ChiroTouch, we understand the importance of supporting and working with state chiropractic associations across the country, said Robert Moberg, President of ChiroTouch. We are excited to have the opportunity to share our advanced total practice management software at the TCA conference this year.

Â

From the TCA website: The Texas Chiropractic Association traces its roots back to 1916. We serve to protect chiropractic professionals, their patients, and the right for Texans to choose chiropractic as one of their health care options.

Â

Fully-certified chiropractic software designed from the ground up to maximize efficiencies for virtually every process, including patient self check-in, scheduling, SOAP notes, billing, interoffice communication and more, ChiroTouch has developed its HIPAA-compliant system to drastically reduce the time it takes to perform tasks that chiropractors are already doing. That gives chiropractors more time to see more patients resulting in increased referrals, improved efficiencies, and a direct, measurable impact on practice profitability.

Â

In addition to attending various association conventions, and in the effort to support the chiropractic

community, ChiroTouch teams up with state associations to give practices the opportunity to discover the power of the worlds leading total practice management software while contributing to their own Association. For each practice that signs up for a free, no-obligation demonstration of the ChiroTouch software system, ChiroTouch donates funds to the Association. Additionally, for those Association members that sign up with ChiroTouch after participating in the demo, ChiroTouch picks up all, or a majority, of the State Association fees on behalf of the doctor.
