Online PR News â€“ 30-August-2012 â€“ TEVA, Teva Pharmaceutical Industries Ltd.

Â

TEVA reported that the U.S. Food and Drug Administration (FDA) has granted approval for tbo-filgrastim (XM02 filgrastim), the first new granulocyte colony-stimulating factor (G-CSF) to be approved in the United States in more than 10 years. Tbo-filgrastim is a short-acting recombinant form of G-CSF, indicated to reduce the duration of severe neutropenia in patients with certain types of cancer (non-myeloid malignancies) who are receiving chemotherapy that affects the bone marrow. Neutropenia is a condition in which the number of white blood cells is decreased, leaving patients more susceptible to potentially life-threatening bacterial infections. TEVA is a leading global pharmaceutical company, committed to increasing access to high-quality healthcare by developing, producing and marketing affordable generic drugs as well as innovative and specialty pharmaceuticals and active pharmaceutical ingredients.
