

[PseudoNympho Set to Release Debut Album Eponym](#)

Grunge/Metal five piece PseudoNympho gear up to release their debut album Eponym and accompanying single Accident of Birth through the bands own label Bunnysnot Records.

Online PR News â€“ 07-June-2013â€“ Eponym is released 12th August 2013

Â

Taking inspiration from a range of music, anything from Mastodon to Neil Young, Accident of Birth is the first single off their debut album Eponym. Eponym will be comprised of thirteen full length tracks-five of which were composed by each member individually-and will be accompanied by a short book written by bassist and vocalist, Rio and guitarist, Sam. Accident of Birth is the first single from the upcoming album; a dialogue between someone who makes consumer goods and someone who buys them, coming from vastly contrasting worlds the two try to interpret each others existence that neither have any control over.

Â

Writing of personal experiences as well as political narrative, Eponym can be described as nothing but a proper metal album. There are heavy riffs, face melting solos, deep vocals and deeper lyrics. Songs like Sunshine and Lollipops and Big Enough for Rehab are a metal fans dream, energetic drums and vocals and shredding guitar, all neatly divided with intricate interludes like Zaphod Beeblebroxs Morbid Prophecy and Lunch. As for Accident of Birth- after a gentle introduction youre hurled into the oceans of musical talent that is PseudoNympho. With killer riffs, reminiscent of those of an early Alice in Chains or Pantera, accompanied by thumping beats and some classic metal vocals Accident of Birth is a great taste of whats still to come from PseudoNympho.
