

[Handheld UHF RFID Data Collection Terminal Features Long Read Range](#)

This ultra high frequency RFID reader/writer has been successfully used in applications such as logistics, anti-counterfeiting, warehouse management, vehicle inspection and fixed asset management.

Online PR News â€œ 04-August-2013â€ Toronto, Canada - GAO RFID Asset Tracking is offering its handheld UHF RFID data collection terminal. This ultra high frequency RFID reader/writer has been successfully used in applications such as logistics, anti-counterfeiting, warehouse management, vehicle inspection and fixed asset management.

Â

The advanced RFID data collection terminal, model 246016, has full tag data read/write capabilities and is compliant with ISO18000-6C/EPC Class 1 Gen 2 protocols. It features a 3.5 inch high definition touch screen, large memory capacity and operates under Windows CE 6.0 operating system. Used with a circularly polarized 4dBi antenna, it provides a long read range of up to 7 meters. It utilizes USB 2.0, RS232 andRJ45 interfaces for data transfer. In addition, it is rated to IP65 protection level and performs well even in demanding environments.

Â

This ergonomic, easy to carry UHF RFID data collection terminal belongs to GAO's family of Compliance Asset Tracking Readers. Other featured products in this line include UHF 902 MHz Gen 2 IP54 Portable Handheld RFID Reader which is ideal for supply chain management, industrial manufacturing and other applications where rugged mobile data collection is required; Industrial Handheld Mobile Computer which features a rugged yet lightweight design, large memory space, increased operability and high definition VGA display; and Rugged Handheld UHF RFID Bluetooth Reader which is compliant with EPC Global Class1 Gen 2 and ISO 18000-6C standards and allows for easy connection to devices such as PDAs, laptops or smart phones.
