

[Block Scientific Offering Brand New Octafuge Plus 220V Centrifuge at a Special Price](#)

Octafuge Plus 220V Centrifuge is offered at special price at Block Scientific this week

Online PR News "06-August-2013" Block Scientific is offering a brand new model of the Octafuge Plus 220V centrifuge at a special price this week. The product comes with a manufacturer warranty. This is a great opportunity for laboratories looking to enhance their hematology operations with an efficient and cost-effective new centrifuge.

Â

This quality instrument has an 8-tube capacity, fixed speed rotor with 3300 RPM, and timer. It can accommodate most 3ml-15ml test tubes. The wide stance eliminates wobble while its suction-cupped feet prevent slipping. Specimens can be easily viewed via the lid port when the instrument is in use. The other features of this quality centrifuge are:

Â

- Auto-off 30-minute timer with bell
- Blue LED power indicator light
- 220V power
- Maximum RCF=1,350 g
- Angled head rotor
- 3,300 rpm fixed speed - for blood only
- Brushless motor (220V only) - maintenance free

Â

The weekly deals that this New York based lab equipment supplier are a great support for small and medium-sized labs with budget constraints.

Â

The quality lab instruments, reagents and consumables that Block Scientific supplies are competitively priced. Customers can also opt to enroll in the user-friendly reagent rental plan that this offers.

Â

Block Scientific also provides prompt and reliable onsite and in-house services for the equipment supplied. This includes maintenance and service contracts, installation, and repair solutions. In addition to professional installation of lab equipment to ensure smooth and efficient functioning, the company undertakes to provide lab personnel with equipment familiarization sessions following installation.

Â
