

[The Comeback. An interactive Game Tree of Nadals extraordinary 2013 season.](#)

Today we released Nadals interactive Game Tree application to celebrate his historic 2013 season. Nadals Game Tree allows you to explore how his 600+ service games played out in the Grand Slams, Masters 1000 and World Tour Finals.

Online PR News "12-November-2013" This rare point-by-point summary shows where Nadals history breaking season was won and rarely lost.

The Game Tree interactive is an experiment to see what we can do with traditional forms of tennis data. Please let us know what you think; wed love to hear from you!
