

[High Frequency Long Range Reader with the Excellent Performance](#)

Recently, DAILY RFID has released high frequency long range reader, upgrading both product performance and technology with high quality manufacturing standards.

Online PR News “24-June-2014” Recently, DAILY RFID has released high frequency long range reader, upgrading both product performance and technology with high quality manufacturing standards. For this reason, received national acclaim all the time, DAILY RFID constantly wins new and old customers at home and abroad.

Â

Then, High Frequency Long Range Reader DL5510 is one of the best examples, which works on 13.56MHz frequency with 30~50pcs/s tag processing speed. Thanks to the advanced anti-collision algorithm and high identification rate, range from 10cm to 40 cm can be read easily under the high frequency long range reader. Moreover, adopting DAILY RFIDs exclusive antenna design with sufficient power supply, the high frequency long range reader can not only support standard 50Ohm RFID antenna under high security, but it also can support dual tag decoding mode as well.

Â

As a result, the enhanced features and functionality lead to the great success of high frequency long range reader. Working with I-CODE 2 and supporting transparent command format, it is provided with stable operation and good performance at affordable price, which is considered as one of the most worthy RFID readers in markets.
