We know the tax season has always been a chaotic time as you already have work on your plate and you have to file form 2290 on time. However, the method of filing also matters here. Paper filing would allow you to file with ease but the delivery of schedule 1 copy would eventually delay. Efiling is another method that would allow you file with ease, with the provision to file from anywhere any time. And this idea of filing gave birth to Tax2290.com. We kick started this venture in the year 2003 to bring in a change in this chaotic life, and we believe that, somewhere, somehow, we have made a difference. We see truckers across the nation, are today efilng their return in order to save time, energy and money. Who would prefer filing with penalties? And when you have weekend assistance just one phone call away, why would you not opt for efilng.
