

[Automation Equipment and Industrial Automation Systems Directory Debuts Today](#)

New international industrial automation suppliers directory and industrial robots guide from manufacturing news publisher IndustrialPR.net

Online PR News â€“ 06-August-2010â€“ Newark, New Jersey The international manufacturing and engineering news site IndustrialPR.net, publisher of guides focusing on various tools, machines, equipment and supplies for the manufacturing and MRO markets, announced today in a news release the debuts of its co-op, interactive Automation Equipment Marketplace at <http://www.industrialsaver.com/classifieds/index.php/cat/182> The company, a division of the US-focused trade portal IndustrialLEADERS.com, said the automated products marketplace includes domestic and global offerings for various industrial robots, conveyors, sorting systems, fully automated and semi-automated packaging machines, robotic assembly machinery and allied equipment.

Â

Michael Blackburn, spokesman for IndustrialPR.net said the marketplace was created in partnership with IndustrialSAVER, an online auction and classifieds for industrial goods and includes a specialized international directory focusing on a wide variety of industrial automation systems, tools and accessories at http://www.arrivenews.com/exhibitors/automation_equipment.html According to Blackburn, over 70 manufacturers, importers and exporters of factory automation equipment have been added to the publication from nearly 30 countries offering an array of motion control and drive systems, manufacturing execution machines, complete turnkey robotic systems, machine vision, integrated manufacturing and programmable logic control equipment.

Â

The various manufacturers, dealers and distributors featured on IndustrialPR.net have been selected because of their professionalism, project management and technical solutions, technical expertise, ability to meet budgets, and stability, flexibility to meet complex needs as well as their all around supply capabilities in the automation equipment field, said Blackburn. He explained, IndustrialPR.net is committed to developing long-term relationships between qualified suppliers of automated systems and industrial robotics with those in need of such solutions for their manufacturing facility.

Â

About IndustrialPR

Â

IndustrialPR.net is an online engineering and manufacturing news portal providing the latest stories, feeds, editorials and articles covering newly launched industrial tools, equipment, machinery and other resources for manufacturers worldwide. The site unveils some of the most advanced industrial products, services and technologies being introduced into the marketplace by leading innovators in national and global markets at <http://industrialpr.net>
