

*IndustrialSAVER.com, an online marketplace for manufacturers worldwide introduces its latest offerings for industrial PCs and allied equipment*

*Online PR News* â€“ 23-August-2010â€“ Greensboro, North Carolina - IndustrialSAVER.com, the online marketplace to buy and sell industrial goods and services introduced its computing equipment offerings from international manufacturers, dealers and exporters specializing in industrial computer systems, rackmounts, ruggedized monitors, stainless steel keyboards, rack mount monitor, factory floor computer equipment, industrial PC components and related products at <http://www.industrialsaver.com/classifieds/index.php/cat/68> The company said in a press release offerings on the industrial computer-focused marketplace change daily as equipment are bought and sold on the site from registered users and visitors.

Â

According to Michael Graves, spokesman for IndustrialSAVER, a division of Boston suburb based Industrial Leaders, the company also publishes a directory enabling companies to explore and compare offers for notebooks, tablet PCs, netbooks, desktops, rugged factory floor industrial computers, oversized monitors, all-in-one PCs and accessories at <http://www.arrivenews.com/exhibitors/computers.html> Graves said special sales for complete turnkey integrated EATX and ATX rackmount server systems and custom built computers can be arranged for markets such as industrial automation, aerospace & defense, telephony and communications, medical & science, R&D, test, measurement and data recording, broadcast and multimedia as well as security and digital video creation.

Â

IndustrialSAVER.com and its network of directories, guides and marketplaces has long been committed to being the premier resource to buy, sell and trade computers for the manufacturing community and other industries and its growing offerings for computer equipment is evident of that dedication, said Graves. He added, The site includes suppliers that can design and build leading-edge integrated computer systems, high powered industrial computers and rack mounts as well as allied products for CAD/CAM, robotics, machining, factory automation and other applications.
