

[Macgo Blu-ray Player 2.11.3 Support Mac OS X 10.10.3](#)

Macgo has released its latest version of Macgo Blu-ray Player V2.11.3 with its support of Apples Mac OS X Yosemite 10.10.3.

Online PR News â€“ 10-April-2015â€“ Macgo (<http://www.macblurayplayer.com/>) has just upgraded its Blu-ray Player to 2.11.3 during this most pleasant season of the year. Macgo is the one who makes Blu-ray finally supported on Mac OS by having developed the first Blu-ray Player for Apple, which recently released OS X 10.10.3. This is a big upgrade for Apples desktop OS, including features like the all-new Photos app, more than 300 new emojis, a new look up panel with Spotlight suggestions, and improves Macs compatibility, stability, and security.

Â

Right after Apple has announced its latest OS release, Macgo tested its Mac line products under OS X 10.10.3. It turns out that Macgo Blu-ray player 2.11.3 works just fine with this new operating system. Users who want to see what will happen when play Blu-ray on OS X 10.10.3 with Mac Blu-ray Player, please be assured to download and purchase.

Â
