

[KantanMT Presents and Exhibits at 28th Localization World, Maritim Hotel, Berlin](#)

KantanMT participates in the Localization World conference. Founder and Chief Architect, Tony ODowd will present and exhibit in the Maritim Hotel, Berlin.

Online PR News â€œ 13-May-2015â€œ KantanMT is pleased to announce that once again the company will participate in the Localization World conference and exhibition series. As a member of the conference program committee, Founder and Chief Architect, Tony ODowd will both present and exhibit at this years conference in the Maritim Hotel, Berlin.

Â

As a program committee member, Tony was involved with the conferences presentation selection process, and will also act as conference host for Adobes session entitled; Localization Strategies to Support Multi-Branch Development on Thursday, June 4th at 9:00am in Saal Berlin.

Â

On Wednesday 3rd June, Milengos Deepan Patel will join Tony ODowd to present machine translation use cases across three industry verticals at the TAUS Translation Technology Showcase from 1.30-5.00pm in Salon 16 Riga. This interactive session, which is organized by TAUS is for everyone interested in translation and translation technologies.

Â

The KantanMT Team will be exhibiting at booth #17, in Hall Berlin from Thursday 4th until Friday 5th June. Attendees can visit the booth to learn more about the KantanMT.com platform and receive or sign up for a personalised demo.

Â

LocWorld brings together the top global suppliers of translation and localization services, and some of the most influential speakers in the industry, said Tony ODowd, Founder and Chief Architect, KantanMT.com. We are excited that we are once again involved with this prestigious event.

Â

The full LocWorld program is available at www.locworld.com. If you would like to arrange a meeting with Tony in Berlin, send an email to info@kantanmt.com.

Â

About KantanMT

KantanMT.com is a leading SaaS based statistical machine translation platform that enables the KantanMT community to develop and manage customised machine translation engines in the cloud. The innovative technologies offered on KantanMT.com allows members to easily build MT engines in over 750 language combinations, seamlessly integrating into localization workflows and web applications. The secure, highly scalable MT solutions are quick to deploy, so large volumes of content can be translated on demand and to a

high quality. KantanMT is based in the INVENT Building, DCU Campus, Dublin 9, Ireland.
