

[Bodet UK Launches New Award-winning Interactive Staff Communication Terminal](#)

Bodet Ltd has just launched the Kelio Visio X7, an award winning interactive attendance and communication terminal to simplify and improve staff interaction.

Online PR News "01-September-2015" The new multifunctional terminal has already scooped a 2015 Red Dot Award for its innovative qualities and design excellence.

Â

Initially conceived as a hand-held device to allow all staff members to clock on and off using card, key fob or fingerprint, the Kelio Visio X7 developed into a mobile multi-functional unit. As well as providing attendance data, the console also allows staff to request holidays or time off, and different departments within an organisation can send personalised messages to each staff member, issue announcements and make documents directly available to everyone in the company.

Â

The Kelio Visio X7 has a range of applications for HR departments including managing staff attendance, advising remaining holiday time, and creating meaningful real-time management and payroll reports. It can also be used for additional personnel functions that will assist staff in their normal daily activities, such as a staff directory, a database of phone numbers, accessing their own personnel reports and even booking meals in advance from staff canteens.

Â

Featuring a 7 touch screen, the Kelio Visio X7 has an easy to operate and highly intuitive interface which means minimal training is required. It is also ultra customisable, upgradable and the screen graphics can even be adapted to match the user company's corporate colours and style.

Â

The innovative and interactive clocking terminal and information source impressed the Red Dot Award jury who commented We were impressed by the Kelio Visio X7 time & attendance management systems feature-rich functionality and ease-of-use.

Â

Were thrilled with this award said Richard Manby, managing director of Bodet Ltd. It recognises our products outstanding design and underlines how important design and functionality are to our organisation. The Kelio Visio X7 provides businesses with a very user-friendly and high-performance terminal which we expect will revolutionise time & attendance management.
