

## [Android 6.0 or Marshmallow - The Latest Android Operating System](#)

*iDROID USA will soon join hands with this latest trend in the coming few months*

*Online PR News* â€“ 07-November-2015â€“ iDROID USA has researched a lot over the phones being launched in the world and have come to notice that the faster the technology is changing nowadays the more quickly you have to adapt to it in order to survive in this competitive age of smartphones.

The Marshmallow update by Google is just a start in the race of being one of the top contenders of smartphones like some of the models of Nexus series. iDROID USA will soon join hands with this latest trend in the coming few months. It will launch its flagship phones under the Googles latest operating system Android 6.0.

Android 6.0 has many interesting features that will keep the iDroidians engaged in one way or the other. They will definitely find it intriguing as to know their fellows still using Lollipop when they are using Marshmallow instead. iDROID USA has always kept the promise of maintaining a steady and advanced outlook towards technology and giving the best to their users with extensive Research and development.
