

SIGMA TEST & RESEARCH CENTRE is one of the fastest growing organization in the field of calibration.

Online PR News " 15-March-2016 " Now-a-days, nothing is sure!!! Then undoubtedly, our main concern would be purity that affects our health and atmosphere. Even regarding our life then its terribly troublesome to make sure the purity and life longevity of a product employed in our lifestyle. So, there comes the requirement of International standards that should be followed across the planet to facilitate the ideas on purity and stability. Hence, Bharat comes up with Bureau of Indian Standards (BIS) act as National commonplace body that conducts a Product certification theme to keep up the interest and trust of shoppers.

To formulate International Standards and obtain License, makers come back to laboratories (Govt Certified) for his or her product to be tested and to produce merchandise on continuous basis. Lets think about our terribly own urban center...Being Capital, urban center have various Testing laboratories and definite criterion & diversity of testing.

Â
