

[CDS Introduce LOW Cost, High Reliability, Full HD Display Monitors Available EX-Stock!](#)

Crystal Display Systems have introduced their commercial and professional monitors to the display monitor market.

Online PR News "05-May-2016" Their budget-friendly commercial grade ProCom range is available from 32€ to 84€.

Â

The displays utilize the latest LED backlighting technology and offer improved brightness and contrast as well as drastically improving their lifespan and reducing their power consumption.

Â

The displays are fitted with industrial grade panel and components as well as an integrated media player with a USB plug and play function. The monitors utilize the latest LED backlighting technology resulting in improved brightness and contrast. These impressive products are completed with built-in audio, an ecofriendly power timer as well as smart temperature control systems.

Â

The ProCom range is so versatile they have been implemented in a wide variety of applications including; restaurants & shops, exhibitions, schools, surveillance & security and many more.

Â

All units are soak tested before being ready to ship worldwide!
