

[HTL to Unveil LED Video Display Solutions at Prolight 2016](#)

As a leading LED display supplier in China, HTL offers a whole a solution for the video LED solutions and has constantly developed new products into the market.

Online PR News â€“ 25-June-2016 â€“ HTL will launch a showcase of its LED video solutions at Prolight 2016. With the Booth No.M398, HTL will promotes the F8 and F8 Raddit LED video walls, F8 LED video stand and F8 LED video display technologies.

Â

Through a demand for more visually creative commercial environments, we have witnessed an extraordinary growth in the incorporation of our LED video technology into the professional audio/visual industry, said Taddy Liu, HTL Director of Marketing. Prolight grants us a tremendous opportunity to show the creative potential of our innovative LED video solutions, and we are thrilled to share our technology with visitors from around the world.

Â

The F8 is available in two sizes with 3.0mm-6.25mm pitch options, Raddita 6.25mm full outdoor, IP65 version as well. For optimum performance, F8 tiles are calibrated directly out of the box to ensure color and brightness and provide easy access to the back of panels allows for quick and simple on-site repairs.

Â

F8 Raddit is capable of a 15-degree curve in any direction and is one of the highest resolution curve-able LED screens on the market.

Â

Because of its bright, dense display and high refresh rate, F8 Raddit photographs and videos smoothly and its tiles are calibrated directly out of the box to help decrease failure, and insure perfect color and brightness of your LED screen.

Â

A replacement for traditional static and backlit signage, the F8 LED stand is a self-contained 3.0mm pitch/resolution video display with a sleek design for easy mobility throughout any space. Its Wi-Fi connectivity allows for convenient networking and content updating to maximize the viewer experience and it is customizable with multiple base options. The LED display panel of F8 can be further customized to a specific size with an assortment of color aluminum frame options, Radditit can create right angles to wrap around 90 degree corners wherever needed.

Â

Giving designers and architects even more creative freedom, F8 is a flexible and magnetic LED display. Its ability to curve and attach to virtually any surface makes it perfect for those installations that call for a non-traditional LED solution with an extremely high resolution.

Â
