

[Michael Egan, Executive Director at Merck, to present at CNS Diseases World Summit 2016](#)

Michael Egan, Executive Director, Clinical Neuroscience at Merck to present at CNS Diseases World Summit 2016

Online PR News â€“ 19-July-2016 â€“ Michael Egan, Executive Director of Clinical Neuroscience at Merck, will give a featured presentation at GTCbios CNS Diseases World Summit 2016 to be held on September 12-15, 2016 in Boston, MA.

Â

This meeting provides an interactive learning and relationship-building forum for all players in the CNS field. Colleagues from industry, academia, government agencies, and financing bodies will gather at the interface of research, partnerships, funding, and commercialization to find ways to move forward in a field that has been troubled with clinical failures.

Â

The program will provide a comprehensive look at the current state of CNS, from research to commercialization. Above all, this event will provide networking opportunities in an intimate and accessible environment.

Â

The CNS Diseases World Summit consists of two, back-to-back conferences:

Â

10th Neurodegenerative Conditions Research & Development
Sessions include:

- I. Neuroinflammation Across CNS Disorders
- II. Advances in Parkinsons Disease Research & Therapeutics
- III. Advances in Genetics and Systems Biology
- IV. Biomarkers: Translation from Discovery to Clinical
- V. Novel Therapeutics & Approaches in Alzheimers Disease
- VI. Rare and Orphan CNS Disorders

Â

9th CNS Partnering & Deal-Making

Sessions include:

- I. CNS: Present and Future
- II. Partnering & Licensing in CNS
- III. An Update on Neurodegeneration and the State of the Art
- IV. What Sells Big Pharma in CNS
- V. Partnering with Patient Groups to Advance Research
- VI. Regulatory Considerations for Orphan Drug Products
- VII. CNS Perspectives: Venture Capital and Public Markets
