

[Biztech Launches MageMob Admin Application With Value Added Features](#)

Biztech recently launched a mobile app called MageMob Admin for Magento Admin Management.

Online PR News “26-July-2016” Biztechs MageMob Admin app has been enhanced with additional features and functionalities that help online merchants track their product management, products details and customers data on-the-go. No matter how small or big your eCommerce store is, it can be easily explored on iOS and Android both platforms. It is a feature packed extension app that supports multi level online stores and offers a great user experience.

Â

MageMob Admin is supported by advanced technologies and businesslike features with highly secure solutions. Maulik Shah, CEO of Biztech stated that, Our Magento app development team comprehends business requirements and offers services and solutions that are eCommerce oriented. The usefulness of MageMob Admin and its convenient solutions distinguish it from our competitors. Businesses seeking growth can now use MageMob Admin to manage their Magento store 24X7.

Â

He further added, With the help of this app, online merchants can improve their stores in a real-time way. Moreover, product reviews given by customers are easily managed on-the-fly. Merchants can also create invoices against sales orders; get notifications about products and much more on-the-move. Setting up this app in any mobile device is so easy. Talking on his companys objective, CEO also stated that, We believe in serving productive eCommerce solutions to various business sectors. Our main focus is on flexibility and reliability.

Â

Magento mobile apps like MageMob Admin helps businesses engage their customers and boost their overall online sales. No matter what type of store you are running, this app will give your store a boost and help achieve new heights of business growth.
