GTT Expands Reach in U.S. With New Points of Presence

Online PR News â€“ 15-December-2016â€” GTT Communications, Inc. (NYSE: GTT), the leading global cloud networking provider to multinational clients, announced today the launch of four new points of presence (PoPs) in the United States: San Diego, California; Detroit, Michigan; Chandler, Arizona and McAllen, Texas.

Â

These new PoPs extend GTT's Tier 1 global network, ranked in the top five worldwide, and provide more locations where clients can securely and privately connect to leading cloud service providers through GTT's comprehensive portfolio of cloud networking services. In addition, the McAllen PoP serves as a key interconnection point for organizations that require reach into Central and South America.

Â

GTT's expanded U.S. network footprint helps us to deliver greater value to our client base, said Rick Calder, GTT president and CEO. Through these new facilities, GTT can provide deeper reach into key U.S. markets, supporting our clients growing bandwidth requirements and business-critical applications and services.

Â

The new PoPs follow the launch of several other points of presence on GTT's network earlier this year in the Middle East and Australia.

Â

About GTT

Â

GTT provides multinationals with a better way to reach the cloud through its suite of cloud networking services, including wide area networking, Internet, managed services and voice services. The company's Tier 1 IP network, ranked in the top five worldwide, connects clients to any location in the world and any application in the cloud. GTT delivers an outstanding client experience by living its core values of simplicity, speed and agility.
