

[Foxreal Blu-ray Ripper Updated with MKB V20 Support and CUDA acceleration](#)

Foxreal Blu-ray Ripper is updated with its absolute support for MKB V20. With the advanced CUDA acceleration and the unique audio and video sync technology, users can get the best enjoyment.

Online PR News â€“ 28-December-2010â€“ December 28, 2010 - Foxreal Studio, an excellent and professional developer, has updated its hot sale product Foxreal Blu-ray Ripper which can decrypt, rip and convert any latest generation Blu-ray and common DVDs to almost all popular formats for enjoying on PC or portable devices. This significant updating is mainly based on customers need and future development trend. More humane designs and practical functions are added to this product for better user experience.

Â

The biggest highlight of this update is the MKB v20 support. With it, the latest Foxreal Blu-ray Ripper enables users to crack, rip almost all Blu-ray discs with protection of AACCS (Up to MKB v20), region code or BD+ to many other regular video formats for playback on kinds of portable and hardware devices or players. What's more, this powerful Blu-ray Converter adopts CUDA acceleration. Now, users can rip blu ray discs copyrighted by MKB v20 to their HTC Droid, HTC EVO 4G, Nexus S, Droid X, HDTV, TViX, WDTV, Apple TV, Galasy S, Galasy Tab, iPad 2 or other portable devices with 500% faster conversion.

Â

The latest version now has fixed the bug for those BD+ discs collapsed when conversion. So, users are able to fast decrypt their BD+ discs without problems.

Â

Apart from two updated features mentioned above, the latest version of Foxreal Blu-ray Ripper maintains the advanced audio and video sync technology to perform a better audio and video sync effect. With this wonderful application such terrible problem that audio is 1 second faster than mouth will never happen. Now users can enjoy HD videos easily with it.

Â
